

Adding Physical Groups:

At the side menu go to **Modules -> Geometry -> Physical groups -> Add:**

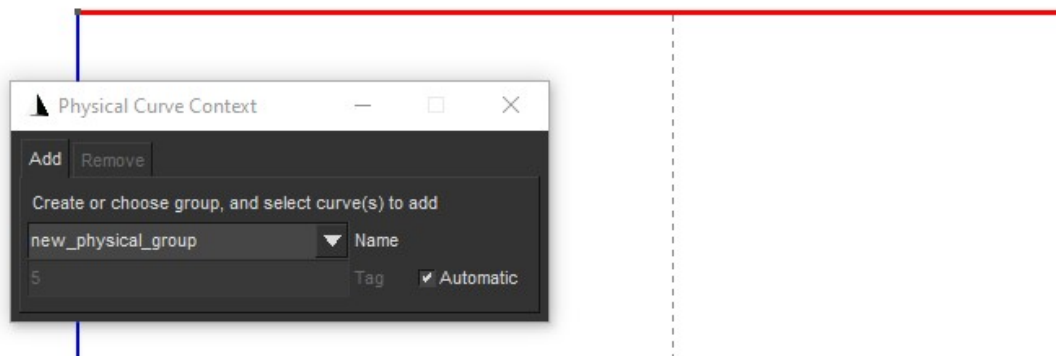

Here you can choose for what kind of element in the geometry you wish to add a Physical Group. When you click on one of the option the program will prompt a new window, where you can write the name of the Physical Group, and choices the elements on the geometry that belongs to the Physical Groups:

After inputting the name of the Physical Group, you can select the elements of the geometry and press "**e**" on the keyboard to confirm the selection:

### Select curves

[Press 'e' to end selection, 'u' to undo last selection or 'q' to abort]

You can notice that when you select the elements the element will turn red. After confirming the selection you can hover your mouse on the elements and look at the tip to see if the Physical Group was correctly assigned:
